Louise Mehaffey has been creating glass crafts for more than 25 years. She works from her studio, The Glass Place, in Wyomissing, Pennsylvania.

If you're looking for unique designs like the cover.....don't expect them in between the pages. The book has a 'botanical' and 'traditional' section. The traditional section is a throwaway. If you own other glass design books you've already got this section covered and don't need another rehash of the same. The botanical section is nice but I have several cautions if you're looking to buy. 1.) The most innovative design really is the cover. It goes downhill from there, or I guess I could say more like designs you could find anywhere. 2.) a decent amount of the designs are the circle/octagons for hanging in a window. If you're into that type of thing then you won't mind but I consider those kind of dated looking. True you could adapt the design to what you need/want but I generally didn't find the book worth having. 3.) Several different 'designs' are just different adaptations of the same design. For example, there are three crab apple designs. One is a panel, one a panel for a kitchen cabinet and another a circle/octagon. For me this just wasn't worth it. Returned. I think Ms Mahaffey should have perhaps released one of the folder like design booklets that you can find in glass supply shops that have a 3-5 designs contained within.

I received your books lots of different patterns. Thank you Connie

This is a lovely book. I only wish they would tell how much the pattern, in percents, needs to be enlarged in order to make the suggested size. .

Wonderful book the Author shares a lot of his tips. Very nice patterns you can enlarge also shows his completed works in color with those patterns..

Like the designs, helps me with my own designs by seeing how others place their cut pieces. Many fun designs and easy to enlarge design to fit windows.
