This is really great book about meditation and prayer. It very informative for everyone. Before read this book I don't have proper information or ideas about this but now I know healing is very important for our mind and sold also health we need to increase our Healing powers. I like this book very much Healing define us about God power and the power of nature. We all need to know about healing properly.

Great little book here. My favorite chapter from the book was Chapter 4: Practicing self-healing through healing medicine. The energy medicines and the placebos gave me a new way to interpret how channeling my energy will help my overall healing. When you combine the 6 practices of healing into a complete process that are tailored to your needs, you can begin to fix issues that may have affected your well being in the past. Well written, concise and to the point.

The body can heal themselves. Nature can also help the body heal itself. This book says so. This is an interesting topic for me since I rely on modern science to cure any ailments. A positive outlook on our situation, making our misfortune into an opportunity and having a positive mindset will do miracle to heal yourself. That's why understanding and total comprehension of these things plus how our works and what factors influence it is essential in order for us to live a better and a happy life. I think this is more than enough.

Great read to learn how to live a more balanced life. I absolutely think this is great book. All opinions are my own and they are not influenced by anyone but myself. If this review helped you at all please
