National Geographic Kids Brain Games: The Mind-Blowing Science Of Your Amazing Brain

Synopsis

QUICK: Name the most powerful and complex supercomputer ever built. Give up? Here's a hint: It's housed in your head and it's the one thing that makes you YOU. Your brain is mission control for the rest of your body and steers you through life. Not bad for something the size of a softball that looks like a wrinkled grey sponge! In this fascinating, interactive book -- a companion to the National Geographic Channel hit show -- kids explore the parts of the brain and how it all works, brainy news nuggets from a neuroscientist, plus fun facts and crazy challenges.

Grade Level: 3 - 7

Customer Reviews

"This book is over 100 pages of fun. It offers clever brain challenges, activities designed to give the brain a much-needed break, and even explains how the Rubik's Cube can actually improve the thinker's life... The pictures are vibrant and detailed, leaving nothing to the brain enthusiast's imagination." -- New York Journal of Books

JENNIFER SWANSON is the author of over 14 nonfiction books for children. She specializes in writing about science and technology. Her children's book *Body Bugs: Invisible Creatures Lurking*

Inside You was a 2012 Book of Note with the Pennsylvania Librarian Association. Jennifer has a M.S. Ed in K-8 science and is a middle school science instructor.

My son is a "facts" kid. This is a great book for him. He took it on a long road trip and enjoyed it.

National Geo Kids Brain Games: also bought this book for my 9 year Old/big grandson that loves Brain Games and He loves it. So if you have kids with very inquiring minds this is a great book to buy them. Enjoy : from a Grandma that loves to keep her grandson's mind very busy.

My students love this! I use it in the classroom for my neurology unit with upper elementary age students. There are some really interesting things in here to entertain.

This was a gift for my grandson. He and his brother love reading and trying things. We're going to get together in a few weeks so I've asked them to bring the book so we can work through some of the games together.

A fun read that presents solid brain science at an elementary level. The visual brain puzzles make good car entertainment. Well put together!

OK...but, not as good as I expected. Not enough brain games to engage in...so it was not challenged enough. Gave 3 stars because the pictures had vibrant colors.

We love watching this TV show, and so I ordered this for my 8 year old son. He dove right in and started poring through it!

My nephew loves this book! Getting any boy to read, is a "wonderful" thing! He my wonderful endorsement!
