Gr 1-3-An easy-reader look at those most popular, if fearsome, fish. Eye-catching illustrations accompany Clarke's text, which includes basic facts on shark physiology and reproduction (no mention of mating), and their wide variety of size, shape, and coloration (speaking of which, Petruccio's lemon shark is brilliantly yellow, and his pink goblin shark, determinedly pink).

Oversimplification creeps in with such generalizations as "And sharks love to eat seals" that should be modified by the word "some," as whale sharks are plankton grazers and tiny lantern sharks would not have a prayer of preying on a swiftly swimming seal. However, the topic is surefire, and this book, which is simpler than Allan Fowler's *The Best Way to See a Shark* (Children's, 1995) or Melvin Berger's *Chomp!* (Scholastic, 2001), and on about the same level as Joanna Cole's *Hungry, Hungry Sharks* (Random, 1986), will circulate nicely. Loved it

My grandson, who is very into sharks, had this book on his wish list so I got it for him. He said it's good and he likes it.

My four year old is really interested in sharks and this little book turned out to be a good intro. It's short and there are 1-2 sentences per page with fairly easy words so it was easy for him to memorize and now "read" i.e., recite to me. Highly recommended for a young pre-reader.

Encourages and thrills.

My step-son really enjoyed it and read it as soon as he received it! Very educational, as he started immediately bugging me with questions if I know what's the biggest shark, etc. :) Great book for a great price!
