Synopsis

Joint Publication 3-25 JP 3-25 Countering Threat Networks 21 December 2016 The worldwide emergence of adaptive threat networks introduces a wide array of challenges to joint forces in all phases of operations. Threat networks vary widely in motivation, structure, activities, operational areas, and composition. Threat networks may be adversarial to a joint force or may simply be criminally motivated, increasing instability in a given operational area. Countering threat networks (CTN) consists of activities to pressure threat networks or mitigate their adverse effects. Understanding a threat network's motivation and objectives is required to effectively counter its efforts.
