20 Compelling Evidences That God Exists: Discover Why Believing In God Makes So Much Sense

Synopsis

Is it Reasonable to Believe? Remarkably, even though millions upon millions of us do believe in God, when we are asked why we have such faith, we become tongue-tied and struggle to give a reason for our hope. No wonder those who don't believe God exists remain unconvinced! —there's too few of us ready to speak on God's behalf! Ken Boa and Robert Bowman have provided a resource that tackles the most profound arguments from philosophy, science, sociology, psychology, and history ... and presents twenty clear, concise, and compelling evidences that show that faith in God —and specifically Jesus Christ— is reasonable. —Kenneth Boa is engaged in a ministry of relational evangelism and discipleship, teaching, writing, and speaking. He holds a B.S. from Case Institute of Technology, a Th.M. From Dallas Theological Seminary, a Ph.D. from New York University, and a D.Phil. from the University of Oxford in England. Dr. Boa is the President of Reflections Ministries, an organization that seeks to provide safe places for people to consider the claims of Christ and to help them mature and bear fruit in their relationship with Him. He is also President of Trinity House Publishers, a publishing company that is dedicated to the creation of tools that will help people manifest eternal values in a temporal arena by drawing them to intimacy with God and a better understanding of the culture in which they live. Recent publications by Dr. Boa include Faith Has its Reasons, Conformed to His Image, An Unchanging Faith in a Changing World; Face to Face; Pursuing Wisdom; The Art of Living Well; Wisdom at Work, Living what You Believe, and Sacred Readings. He is a contributing editor to The Open Bible, the Promise Keeper's Men's Study Bible, The Leadership Bible, the consulting editor of the Zondervan NASB Study Bible, and the Editor-in-Chief of The Life Promises Bible. Robert M. Bowman Jr. teaches in the Christian apologetics program at Biola University, and is the president of Apologetics.com, Inc., based in Pasadena, California. Previously he served as a researcher and editor for the Christian Research Institute, the Atlanta Christian Apologetics Project, and Watchman Fellowship.

Customer Reviews

I would consider this book to be a great starting point for studying apologetics (the study and defense of the Divine origin and authority of Christianity). The authors, both strong academics, disseminate large amounts of information, and make it very understandable for anyone who reads this. In addition to this, they offer other books at the end of each chapter, for further study. They also offer a study guide at the end, and very thorough footnotes. This is a book that ALL Christians should read, as it gives a very clear argument for the faith we profess. Additionally, this would make a great book to use as a study guide for a small group. I highly recommend this book!

Any person who likes to think intellectually, who might enjoy the occasional philosophical debate or just likes to dig into deeper thoughts would be well advised to read this book. It is very well arranged with thought provoking presentations of in-depth philosophical arguments to challenge the most skeptical of people.

It's an adequate book if you're already a Christian and simply looking for arguments with which to further confirm and insulate your faith. However, if you're an unbeliever and you have well thought out and rational reasons for your unbelief, I seriously doubt that you will find anything here that is intellectually destabilizing enough to convince you that your unbelief is unjustified.

It was good yes, but not easy to read. This one was more for the scholarly also. It does have a lot of figures, some that I can't even count to. Some things to be honest was a bit over my head and would be for the vast majority. If you are an unbeliever or an atheist, then this book would make a good read though, it has all the science you love to refer to and much of it rather than refuting the biblical

claim enhances it. Try it out you might just like it.

Kenneth Boa and Robert Bowman hit a homerun in this practical apologetic book that everyone can read and gain insight from. Peter the apostle said "Always be prepared to give an answer to everyone who asks you to give the reason for the hope that you have." (1 Peter 3.5) This book goes a long way towards giving you resource to help you do just that - give a good reason.

As a Christian, I think this book does provide many compelling arguments for the existence of God. This book may be especially helpful for those individuals that are truly sincere in their search for truth. That said however, to the obstinate skeptic, there may exist no persuasive evidence or argument, compelling enough to persuade them against their own will.

Two different indexes, a sense of humor, explaining how and why the big bang theory would never have worked, logic, math, Bible verses. Saving to my Kindle favorites right now.

Though there were no evidences given that I have not heard of, I did like the orderly and progressive way in which they were presented. This book is good for a person who is new to Faith, or on the brink of believing as a good starting point; however, one has to have ears to hear.
