GoPro Cameras For Dummies (For Dummies (Lifestyle))

Synopsis

Shoot, edit, and share action-packed video with a GoPro The world moves fast—so if you want to capture it in real time, only a fast-moving camera will do. Enter the GoPro! This small but powerful camera is easy to hold, wear, or mount to capture video of all your high-speed adventures. Unfortunately, to the uninitiated, it can be a bit intimidating—but fear not! With the help of this revised edition of *GoPro Cameras For Dummies*, you'll acquire the skills needed to shoot high-quality video or photos, edit raw footage into a final masterpiece, and share your GoPro works of art with the world. Compared with traditional digital video devices, the GoPro is a superhero. Okay, so it can't scale high rises, but it can go virtually anywhere and produce thrilling new perspectives of an epic slalom down the slopes or awesomely scenic hike—and everything in between. When still photos simply won't do the trick, *GoPro Cameras For Dummies* shows you step by step how to use your GoPro camera to make movies, work with available light, create time-lapse sequences, and so much more. Meet the full line of GoPro cameras, including the HERO5, and find the one that's right for you Get help setting your GoPro to shoot better video Discover what you need (or don't need) to shoot in the water Find step-by-step guidance for capturing better sound Edit your work like a GoPro guru Packed with full-color photos and updated to cover the latest GoPro cameras and software, this fun and accessible guide is a gadget lover's dream.

Learn techniques for improving your photos or video, tips on camera settings, professional editing advice, and much more. Inside –| Picking your perfect GoPro Must-have accessories All about camera settings Professional framing tips Succeeding with available light How to get better sound Advice on editing software Sharing dos and don'ts

John Carucci is an entertainment news producer for Associated Press Television. He is the author of Digital SLR Video & Filmmaking For Dummies and Webinars For Dummies as well as other books on creative and nighttime photography. John has also contributed articles to American Photo, Popular Photography, and PC Photo magazines.

There is some useful information, but it is poorly organized and poorly formatted, making it harder to extract than it needs to be. But the worst thing is the writer's cutesy writing style. For example, when discussing accessories, rather than just saying that there are a lot of them, Carucci veers off on some lame discussion about potatoes (honest). And he isn't content to simply waste the reader's time, he insists on showing off as well, referring to potatoes as a "tuberous night shade vegetable." What I wanted was quick access to helpful information about buying and using a GoPro camera. What I got was something different. I'm not sure exactly what it is, but it's definitely not what I was looking for.

The perfect book for everything GoPro. The author really explains things clearly and the book is very well organized. I highly recommend this book.

This is perfect! Bought a GoPro as a gift, and apparently it hasn't been used for fear of breaking it....This book tells how to do it all! How to use all the little pieces and it has helped soooo much! Bravo to the Dummie book writers!

I wish they spent more time on how to use the actual camera. A lot of time was given on the software you can download for free from GoPro. I wanted more information on the actual camera. I knew that would be hard to do with so many cameras each with their own speciality. I guess I was

the "Dummy" to think it would answer my specific questions on my camera.

This book focused more on video editing than the camera functions themselves. Being a "Dummy" beginner I was hoping for complete, step by step camera and operating instructions. Good book but not particularly focused on my basic quest for knowledge.

Gives some good tips but was not a help when my camera stopped operating

gotta find it is helpful

The book spends a lot of time on proper lighting etc but I wanted just basic info on how to make video from my clips. Like how to use the templates on GoPro Studio app. Was not what I expected
