Customer Reviews

This is the second book of the series and it is excellent. It is a post WW III story and it is 10 years after the first book. A new set of younger characters are involved in the story and the operation of the Hive air ship. The Hive is the last of its kind in the world and may be the only home for the last humans alive on Earth. The Hive is a massive airship that is well over 260 years old. Unfortunately it is a wreck because of its age and the shortage of fuel and spare parts. The new generation of Hell Divers still risk their lives to help humanity live. The new Captain, Leon Jordan, is hiding secrets from the entire crew. The previous Captain shared them with him before she died. Jordan will do

anything to hide the truth from the crew and passengers of the Hive. He will kill and even sacrifice his most valuable and loyal crewmen. He believes that only he knows the way for the people on the Hive to survive, but what if he is wrong? The Hell Divers are sent to the ground on an impossible mission with little chance of surviving. They have to face mutant killer species, a deadly environment and carnivorous plants. They discover what really caused the mutants and a possible way to survive. They also know that they have been tricked and sent out to die by Captain Jordan. The only problem is that they have to get back to the Hive before they all die or else they can't share the truth. This is an excellent book. It is action filled and I loved the way the story is told and how the characters are developed. Nicholas Smith has become a top class author and I like his writing a lot. I have purchased all of his books on and I highly recommend them all to you. This new series of Hell Divers is especially well written and I rated this story at five stars. It is full of action. This is an excellent series and you will enjoy reading it. This is book 2 of the series and book 3 will be released soon. This is a great post apocalyptic story with a lot of action and I enjoyed reading it! What makes this story good is the great characters that are developed in the story. In addition the dangers in doing their jobs as hell divers are spectacularly described in horrifying detail. The author's imagination is fully engaged and he creates some of the most horrific monsters and living plants. They will keep you awake at night and reading!

Fast paced story with well developed characters. The monsters in the story seem quite real and very scary which makes the reader turn the pages quickly. When I review a book, I don't do a "book report" type review. What I can say, is this book is a great read and well worth the money. NSS will continue the saga with a third installment which I have a feeling will be the best of the three. The dynamic of the story arc is building. I wonder what new monsters (man and beast) he'll come up with in the continuing story?

Nick Sansbury Smith does it again with a most excellent story. How much longer can the Hive stay afloat? Will the captain understand what everyone else already knows, or does he have some information that really makes him the hero of the story? Will all the Hell Divers survive or will some die on the surface (or trying to get there)? So much suspense. Can't wait for book three. If you have read other Nick Sansbury Smith series, then you know it's not always a happy ending.

Began reading Hell Divers in the interim of waiting for the next Extinction Cycle book to come out. The only thing disappointing about this book, is you don't get to know much more about the one

man you are waiting to find out about. But I can only imagine what the next book will bring. I will be waiting patiently for the next installment to be released. Please don't take too much time in the editing process to delay getting it to us.

I am a huge Nicholas Sansbury Smith fan. His books are excited, character driven and super intense. Sometimes I just have to put them down to take a breather! Hell Divers II was awesome. I found book I on audible and had no idea what I was going to be listening to but I was hooked from the first chapter. I could not wait to see what happened to Commander Xavier and Tin and the Hive. I can't say too much because I don't want to spoil anything but the excitement not only matched but exceeded book 1. Because I already know the characters and was attached to them it was so fun to be back in the thick of the monster filled post-apocalyptic world. No disappointments for me, just fun, emotional, exciting non-stop thrills! Can't wait for book 3.

Absolutely compelling and riveting. A very creative concept, story and plot line with a real gift for dialogue makes this book hard to stop reading, and as you approach the end you are already going to regret not being able to read the third book, well worth the wait. I'd love to say more, but I would not be able to avoid spoilers, so I'll just let this suffice. You must get in on this series of books.

After reading book I in the series, I anxiously anticipated this next installment. Having read it straight through, I find myself having thoroughly enjoyed it every bit as much as the original. The story of an airship with the last of humanity aboard, surviving over 200 years aloft, the Hell Divers descend into the radioactive wasteland to scavenge parts, power, and supplies for their shipmates. This book fills in missing background of the storyline and sets the stage for what is sure to be a great book III. The wait begins....

Of course book one of Hell Divers should be read first. Author has one crazy imagination . The book/story is filled with action and player personality .Hell Divers are the elite, the brave, the crew of an air ship that roams above a devastated earth for hundreds of years. When Divers go to the surface they encounter what's left of life on Earth, and they are not human.
