A.R.E. Building Systems Study Guide And Practice Exam (The Amber Book)

Synopsis

This exam and study guide testsâ "and fostersâ "ownership of concepts in building systems, with an emphasis on the content stressed in the Architect Registration Examination (A.R.E.) Building Systems component. It is designed as a study tool, learning exercise, and confidence-builder. Questions are not reading comprehension devices that follow lessons, but rather opportunities to introduce a topic. Your time is valuable so this study guide does not treat all content that might appear on the exam equally. Rather it weights content by (1) its importance in the A.R.E. exam, and (2) its usefulness to the career of an architect. It further weights the content based on its âœyield.â • In other words, memorizing the entire plumbing code will certainly help you on the A.R.E. exam, but it is certainly not the most efficient means of studying for it.

Customer Reviews

Michael Ermann is a tenured associate professor of architecture at Virginia Techâ™s School of Architecture + Design, where he teaches design studio, environmental building systems, and architectural acoustics. He has taught the building systems course sequence covering energy, passive thermal, mechanical systems, lighting, acoustics, thermal comfort, air quality, electricity, and plumbing for each of the last 20 semesters. Professor Ermann has authored or co-authored eight journal papers in the field of acoustics, and presented more than 20 papers on building systems. He currently is coauthoring the third edition of *Architectural Acoustics*, which has been for decades the most widely used textbook in the field. Heâ™s the former Undergraduate Program Co-chairman and has won design, teaching, research, and outreach awards for his work. Prior to joining the VT

faculty Professor Ermann was an acoustical consultant at Artec in New York City and Siebein Associates in Gainesville, Florida. He received a bachelor of science in mathematics from Tulane University and a master of architecture degree from the University of Florida. He enjoys hosting exam prep seminars for professionals looking to take the ARE Building Systems exam.

I am so happy I bought this. It is more than just questions and answers. Reading this guide helped me to comprehend the subject matters. I took this exam twice and failed. After reading this twice (and skimming through chapters of MEEB), I finally passed!

Highly recommended by many people and it seemed well organized study book.

Great study resource. Used in addition to Ballast and Kaplan, and felt like it filled in gaps / further clarified on topics that were not detailed enough in the main sources. Helped Pass BS - thank you! Would recommend.

Although I am not eligible to enter the A.R.E. exam, I bought this book to learn more about HVAC fundamentals. With this book I learned the basics of Building Science, because it's very visual it is easy to understand how the systems are working. Highly recommended for any Architect who needs to understand the mechanical building system.

Passed the first time around. This book is worth its weight in gold colored paper. Also used Ballast, which was very good and complimentary.

It was a great tool in addition to Kaplan and Ballast study guides. The diagrams in this book were great.

I would definitely say this helped me with the BS exam!! Would definitely recommend this to anyone that's taking it - go over the problems a few times -they help nail down concepts!

Perfect to help understand HVAC better. It is worth the money and the book is easy to go through. The only guide I've bought for the ARE and I don't regret it.
