Natural Hazard Mitigation: Recasting Disaster Policy And Planning

Synopsis

Natural Hazard Mitigation describes and analyzes the way that hazard mitigation has been carried out in the United States under our national disaster law, the Robert T. Stafford Disaster Relief and Emergency Assistance Act. The book is an informative and eye-opening examination for planners, policymakers, students of planning and geography, and professionals working for government agencies that deal with natural hazards.

Timothy Beatley is the Teresa Heinz Professor of Sustainable Communities at the School of Architecture at the University of Virginia, where he has taught for over twenty-five years. His primary teaching and research interests are in environmental planning and policy, with special emphasis on coastal and natural hazards planning, environmental values and ethics, and biodiversity conservation. He has published extensively in these areas, including the following books: *Ethical Land Use*; *Habitat Conservation Planning: Endangered Species and Urban Growth*; *Natural Hazard Mitigation*; and *An Introduction to Coastal Zone Management*. In recent years much of his research and writing has been focused on the subject of sustainable communities, and creative strategies by which cities and towns can reduce their ecological footprints, while at the same time becoming more livable and equitable places. His books that explore these issues include *Biophilic Cities*, *Resilient Cities*, and *Green Urbanism* (Island Press). David Brower is a faculty member in the Department of City and Regional Planning at the University of North Carolina,

Chapel Hill.

Look forward to using for class.

Decent text...no real news here, Its your typical textbook, and not a keeper for the permanent professional library. Worse of all, for the price, the pages are coming loose from the binding...and that's after a month?
