Benson's Microbiological Applications has been the "gold standard" of microbiology laboratory manuals for over 35 years. This manual has a number of attractive features that resulted in its adoption in universities, colleges, and community colleges. These features include user-friendly diagrams that students can easily follow, clear instructions, and an excellent array of reliable exercises suitable for beginning or advanced microbiology courses. In revising the lab manual for the fourteenth edition, we have tried to maintain the proven strengths of the manual and further enhance it. Be Aware! This was advertised as the "Short Version" but was actually the "Indian Version." This volume is NOT spiral bound, is printed on very inexpensive paper, and is Not in color. The color illustration could be helpful, but may not be vital. Just be aware. It has all the same material and information as the Short Version. I checked each page and chapter with the "short version" and it matches. But, it is not the short version. One positive thing: The spiral bound version is really difficult to write in because the paper is waxy and glossy. The Indian version is easy to write in. The spiral version cost \$100.00 used. This cost \$35 new.

I purchased this book for my Microbiology class that I am taking this year at my private university. It was shipped and came the next day thanks to Prime, and it came just as it was marketed. This is a great textbook for base level Microbiology lab manuals and I would recommend this to anyone in need of this textbook, (at least for me it was much cheaper here).

Good book

perfect for my course

Very helpful in a college microbiology lab. Filled with easy to understand and follow information on the topic. I would highly recommend this book to every student getting ready to take a microbiology

lab.

Beautiful

The book came new and everything but it was the INDIAN edition and I couldn't use it in my class so this put me way behind.

Although the book appears to be new, it is an Indian version! I just like to get what I pay for, and once again, I did not! False advertising!!!
